

Tell me about yourself?

Currently a computer science at Georgia Tech

Honors program and 4.0

Summer Internship

Fast Track

BDBI

RoboJackets

Seeking new internship to gain work experience in different field

Why do you want to work for this company?

Highly innovative/technology-oriented company: work with modern technologies like AWS, Innovation and Technology Center

Very collaborative and cross-functional: work with diverse range of people

Community impact – affordable housing, volunteering, small businesses

Development activities – interact with other interns, learn leadership skills

Team or Leadership Related

BDBI

Different strengths, some people are more knowledgeable about certain parts

Collaboration

Why Computer Science

Versatility

Problem-solving and creativity aspect

Constantly growing

Learn Something New

Learn brand new tech stack for FastTrack

Bigger picture

Strengths?

Adaptive – Willing to approach something from a different standpoint if it isn't working

Elaborate with ML

Weaknesses?

More professional experience

Challenge/Failure?

Working on the people detection app

Edge computing devices

Overdesigned first several models

Limited hardware of edge computing devices couldn't handle models

Had to redo weeks of work

Ensure that your solution falls within the constraints of a problem

Conflict with Others?

Team selection for BDBI last semester

Many people wanted the same candidates

3 overlapping choices with another team

Stubborn lead

Found compromise

Integrity?

Cheating in classes

Miscellaneous Stories

Prioritization of school work

Stayed late at work to ensure project made it to production

Created web scraping script to notify me when classes opened up for registration

Data sourcing issue for BDBI project – Store dataframe as pickle file in cloud

Convinced school board to start recycling program across all schools

FastTrack considerations

Questions?

What advice do you have for college students like me interested in working in software engineering?

What is the work culture of Capital One like?

Could you tell me more about your work?

Can you elaborate more about the projects that interns get to work on?

Will there be opportunities to interact with other interns?

What exactly is the difference between TIP and TEIP?

What is your favorite part about working here?
